

## Oil Spill Response Planning Services

SEER Associates can supply the full suite of oil spill response (OSR) and planning services as well as provide these for releases of other substances and general emergency response.

### SEER OSR Planning System

A comprehensive, integrated OSR Management System can be developed and implemented comprising:

- Corporate Oil Spill Management Plans setting Company-wide Policies, Standards, Procedures, Requirements, Guidelines and supporting resources.
- Facility/Operations Oil Spill Contingency Plans containing;
  - OSR preparedness and response responsibilities.
  - Reporting requirements.
  - Planning and Management Procedures Strategies and Guidelines.
  - Response actions designed for specific materials and situations.
  - Response monitoring, assessment and documentation procedures.
  - Plan and equipment maintenance schedules and procedures.
  - Health and safety including decontamination.
  - Waste management.
  - Security.
  - Demobilisation procedures.
- Practical Handbooks covering applicable components of incident management and field response.
- Supporting documents such as management systems documents, environmental plans, strategy or equipment reviews.

### Facilities

SEER Associates personnel have prepared plans for:

- Offshore exploration and production facilities.
- Onshore exploration and production facilities.
- Onshore and offshore pipelines; construction and operations phases.

SEER Associates' experience covers spills of oil, chemicals and mineral slurry as well as general emergency response.

**Integrated ER/OSR Document System**

### Oil Spill Contingency Plans

SEER Associates' OSCP's are based on a thorough review and analysis of the facility risks, oil character and behaviour, ambient environmental conditions, geopolitical conditions, regulatory requirements and agreed priorities.

SEER Associates consultants have a unique combination of substantial incident management, field operations and scientific experience.

This skill and experience is combined to produce OSCP's which are functional, justifiable and provide optimum environmental protection through efficient and effective response.

### Oil Spill Contingency Plan Development

SEER Associates’ OSCP’s utilise clear user-friendly flowcharts, checklists and tables and combine thoroughness with clarity, practical guidelines and instructions.

Training in the use of the OSCP is an integral part of the service provided by SEER Associates and ensures that:

- The client’s staff are familiar with, and have ownership of, the document.
- Information and guidelines for response can be rapidly found, understood and used.
- Ongoing revisions can be done “in house” .
